TO WHOM IT MAY CONCERN

Waikato Shed Company was contracted to extend our existing 10m x 20m x 5.25m gable workshop by 8m and add a 7.5m x 20m x 3.79m lean-to along one side to form one inside area. Awnings over two doorways were also added.

Three bays were required to be clearspan, which involved re-engineering the existing structure and replacing two of the existing portals, to achieve the 17.5m overall span.

One gable end wall and roller door of the existing shed, were relocated to form part of the end wall of the new extension.

This was a challenging project that was completed using Waikato Shed Company's design and engineering services, as well as the material supply and construction.

We are happy to recommend Waikato Shed Company to anyone requiring their services

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'John Whitehead', written over a white background.

JOHN WHITEHEAD
